

Poster peer reviews: Numerical Analysis

Visit at least 5 posters spending 5-10 minutes at each poster to hear about the project. For each poster you visit, provide several sentences for each of the following:

- (a) Project number
- (b) What is the big picture of the project?
- (c) What methods did they use?
- (d) What was their conclusion?
- (e) What is one question you still have?
- (f) What is one thing you think which could be improved?

When you are completed, upload your reviews to Gradescope.
